Lab Exercise 2

Code/Course	:	CSE3002 – Internet and Web Programming	Date	:	27.07.2022
Lab Exercise		HTML Forms-Input Elements	Slot	:	L13+L14

1. Create a registration form to get Patient's details such as Name (TextBox), Address(TextArea), Phone Number(TextBox), Date(Date), Time (TextBox), Symptom (fever, diarrhea, etc.)(Radio Button) and a Submit Button. Use appropriate labels corresponding to the above mentioned input elements and set the left margin as 20em and label position as absolute using internal CSS.

2. Create a Student registration webpage using HTML Form elements (Input types). The webpage must contain the following input types to get the details of the students: Input Types:- Textfields, Textarea, drop down box, checkbox, radio button, submit button, reset button, fieldset.
